### COMMENTARY

#### INTRODUCTION

Trellidor Holdings Limited ("Group") comprises the Trellidor business ("Trellidor") and the Taylor Group businesses ("Taylor").

Trellidor is the market leading manufacturer of custom-made barrier security products, distributed via a dedicated and skilled franchise network situated throughout South Africa, Africa and the UK.

The Taylor Group business incorporates Taylor, a major manufacturer and distributor of custom-made blinds, decorative and security shutters and NMC, an importer and distributor of cornicing and skirting products. The Taylor Group has a strong presence in the Western and Southern Cape.

### **OVERVIEW**

The Group's performance reflects the continued challenges of the economic conditions in South Africa during the period including increasing levels of unemployment, house price deflation, GDP growth significantly below potential and correspondingly poor consumer, investor and business confidence. As a result, consumer spending continues to be negatively impacted throughout South Africa, particularly in the middle-income market, a sector in which the Group is most focused.

Group Revenue for the six months decreased by 4% to R275 million (2019: R286 million). The Group's gross profit margin of 44.6% (2019: 45.0%) was down primarily due to the under recovery of semi-variable expenses.

Overheads were well managed, increasing by only 1.5% over the prior period. Profit after tax of

R27 million and earnings per share of 25.1 cents declined by 17.6% and 15.8% respectively.

It is pleasing to note that the strong cashgenerating abilities of the Group continued despite the adverse economic conditions, with net cash from operating activities of R32 million growing by 27% from the prior period.

In line with the special resolutions passed at the 2019 AGM, the Group repurchased a further 5 561 547 Group shares during the period. These were purchased out of available cash resources at an aggregate value of R22 million and at an average price of R3.94 per share. These repurchased shares have subsequently been cancelled.

Remaining shares in issue are 100 203 596, and weighted average number of share for the period was 104 620 365.

### **SEGMENTS**

#### TRELLIDOR

The adverse economic conditions continue and the impact on Trellidor's target market has led to further turnover decline in the period under review.

The strategies that were implemented to protect and improve margins along with tight overhead expenditure management have provided some relief from the revenue shortfall.

Revenue declined by 7.4%. International sales grew by 5.6% underpinned by a strong performance on the African continent with African sales growing 21.8%. This was offset by weaker performance in the UK which is coming off a strong 2019 base.

The efficiency enhancement project continues to show results and gross margins improved to 47.9% (2019: 47.8%) despite a reduction in revenue.

Overheads remain well managed declining by 5.3% over the comparative period. Operating profit before interest decreased by 10.1%.

### **TAYLOR**

A slight recovery in the Western Cape economy has resulted in Taylor showing revenue growth of 1.3%, despite weaker sales in Gauteng.

Gross margins continue to come under pressure and as result margins reduced to 40.0% (2019: 40.8%).

Improving operational efficiencies remains a key focus for the management team. This is being achieved through both reduction of costs and improved efficiencies.

We anticipate an improvement in margins in H2 2020 as a result of the following measures implemented during the reporting period:

- Recruitment of a new production manager;
- Redesign of the manufacturing process; and
- Changes to the purchasing methodology and suppliers.

In addition, the next phase of the manufacturing ERP system will come online during H2 2020, which will improve the cost management of the production process.

Recurring overheads were well managed and grew by 4.2%.

Operating profit before interest and tax was 12.4% down year-on-year, but profit after tax improved

by 5.2% as result of the amortizing effect of debt repayments reducing interest cost for the period. Sales of Taylor products through the Trellidor Franchise network grew 6.0%, reflecting the continued success of this initiative.

A further strategy in Taylor has been to reduce its stock holding and as a result, inventory is down 18.7% from the comparative period.

The majority of the cash generated by this reduction in stock has been utilised to fund the change of certain suppliers and reduce raw material costs. Trade creditors are also significantly reduced.

The focus on improving working capital management has resulted in net cash generated from operating activities of R7.6 million from a deficit of R0.7 million in the prior year.

#### **PROSPECTS**

The weak economic environment is anticipated to continue and as result the tight control of operational overheads and focus on margin retention and improvement will persist.

As reported in the 2019 year end results, the Group is deploying capital to acquire underperforming franchise areas to improve the effectiveness of the distribution network, and to provide greater strategic optionality going forward.

In this respect, last year, the Durbanville franchise was purchased, and sales volume growth of 23.6% has been achieved in the current reporting period.

Management is seeking to replicate this success in other areas. Accordingly, three franchise areas have been purchased in the eThekwini Metropolitan area and will be consolidated into

a single branch during H2 2020. The execution of this strategy will have a limited impact on the earnings in H2 2020. The full economic benefit will come through in 2021.

Included in the strategic development of this branch is the centralization of administration functions and integration of the complimentary Taylor product set and brand in the region.

Product innovation remains a key strategy for both Trellidor and Taylor. Both businesses are set to introduce new products, to meet changing customer needs, in the local and international market through the course of H2 2020 and into H1 2021.

The Group remains conservatively financed with a Debt/EBITDA ratio of 1.4x (2019: 0.9x) and will deploy unutilised debt capacity to continue investing in the strategy to acquire underperforming franchise areas both in South Africa and aboard.

Given the performance and prospects of the Group, the Board believes the current share price continues to undervalue the business and so will continue to apply excess cash to buy-back shares to enhance shareholder value.

The Group remains focused on its core growth strategies of which the Board believes will position it to benefit from any improving economic conditions:

- · Brand leadership;
- Diversifying its product range;
- Distribution enhancement:
- Growth in South Africa. Africa and the UK.

#### DIVIDEND

FOR THE SIX MONTHS ENDED 31 DECEMBER 2019

#### 1. BASIS OF THE PREPERATION

The unaudited condensed consolidated interim financial information for the six months ended 31 December 2019 has been prepared and presented in accordance with the Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the Listings Requirements of the JSE Limited, the information as required by IAS 34 – Interim Financial Reporting and the Companies Act, No 71 of 2008, under the supervision of the Chief Financial Officer, Mr. DJR Judge CA (SA).

The accounting policies applied, and methods of computation used in preparation of the condensed consolidated interim financial information are in terms of IFRS and consistent with those applied in the annual financial statements for the year ended 30 June 2019, apart from the effect of IFRS 16: Leases which was adopted during the year under review. The results have not been reviewed or audited by the Group's Auditors. The results were approved by the Board of Directors on 05 March 2020.

#### 2. ADOPTION OF NEW ACCOUNTING STANDARD - IFRS 16: LEASES

The Group has adopted IFRS 16 from 1 July 2019 using the modified retrospective transition method and therefore comparative figures have not been restated.

IFRS 16 introduced a single, on-balance sheet accounting model for lessees. The result thereof is that all leases have been recognised on the balance sheet as lease liabilities which had previously been classified as "operating leases" under the principles of IAS 17: Leases.

These lease liabilities are measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 July 2019. (The lessee's incremental borrowing rate applied to the lease liability on 1 July 2019 was between 10% to 17%).

The accounting for lessors did not significantly change.

FOR THE SIX MONTHS ENDED 31 DECEMBER 2019

### The Group's leasing activities and how these are accounted for

The Group leases various production facilities, office buildings and motor vehicles. Rental contracts are made for fixed periods but may have extension options as described below. Leases are negotiated on an individual basis and contain different terms and conditions.

At 1 July 2019, leases are recognised as a RoU asset and corresponding liability at the application date or at the date at which the leased asset is available for use by the Group. Each lease payment is allocated to the liability. Finance cost is charged to profit or loss over the lease period on the remaining balance of the liability. The RoU asset is depreciated over the lease term on a straight-line basis.

### Lease payments

The Group takes into consideration the following factors when measuring the lease liability:

- Fixed payments less any lease incentives received/receivable;
- Exclude variable lease payments;
- Residual value amounts expected to be payable;
- The exercise price of a purchase option if reasonably certain the option will be exercised;
- Payments of penalties for terminating the lease, if reasonably certain that the option to terminate will be exercised.

The lease payments are discounted using the interest rate implicit in the lease, except if the rate is not determinable in which case the incremental borrowing rate will be used.
